

SUBJECT: STUDENT REQUIRED USE, INTERNET AND 1:1 DEVICE (CHROMEBOOK) USE POLICY

The Schalmont Central School District provides all students access to the Internet and network resources as well as 1:1 Devices (Chromebooks) for all incoming 9th grade students to use through 12th grade graduation or separation from the district as a means to promote 21st Century Competencies and support the District Strategic Plan. The District administration has created accompanying regulations that provide specific guidelines and information about the required use and limitations that the school imposes on use of these resources for all 9th-12th grade students assigned a 1:1 Device Chromebook by the District.

In addition to this policy, the use of any district-owned hardware or software requires students to abide by the Technology Required Use policies and regulations, and the Student Code of Conduct. Additional rules may be added as necessary to the accompanying regulation.
