PUBLIC HEALTH EMERGENCY PLANNING

The Board of Education recognizes the possibility of a contagious disease outbreak and acknowledges that it is in the best interests of its students, employees, and the community to prepare for such a scenario. To this end, the Board directs the Superintendent of Schools to implement infection prevention control procedures that minimally follow the guidelines outlined by federal, state, and local authorities.

In the event that the district implements its emergency plan in response to a public health emergency, the Superintendent will keep the Board regularly informed regarding any actions taken and information gathered. The Board recognizes that it may suspend other policies to the extent necessary to comply with executive orders and other governmental guidance during a public health emergency.
