CHARGING OF SCHOOL MEALS

The Board of Education recognizes that the nutrition of district students is an important factor in their educational progress. The Board therefore will participate in federally funded school lunch programs and will provide free [or reduced price] meal services to qualified district students.

The Board of Education recognizes that on occasion, students may not have enough funds for a meal. The Board will allow students who do not have enough funds to charge the cost of meals to be paid back at a later date.

Students who cannot pay for a meal or who have unpaid meal debt will not be publicly identified or stigmatized.

Adoption date: 06/21/2022
